## Education

**Dronacharya College of Engineering** | *Bachelor of Technology in Computer Science* *Expected: 2028*

## Experience

**Webdesino** | **Full Stack Intern** *Apr. 2026 – Jul. 2026*

- Delivered 3+ end-to-end client applications, building scalable **REST APIs**, relational database schemas, and responsive **React/Tailwind** interfaces with optimized API performance.

**Octalucent Software Solutions** | **Frontend Developer Intern** *Feb. 2025 – Apr. 2025*

- Engineered reusable production-grade **React** and **TypeScript** components aligned with design systems; integrated **REST APIs** and maintained reliable client-side state synchronization.

## Open Source Contributions

**open-telemetry / opentelemetry-go-compile-instrumentation** | **CNCF** – Merged PR #800: Added env-var filtering test coverage for runtime compile instrumentation.

**Noveum / orbit** – Merged PR #379 (duplicate issue detection via **PostgreSQL trigram matching**) and PR #372 (workspace live updates feed and project health telemetry).

## Technical Projects

**Push2Prod** | **Next.js 14, TypeScript, Node.js, Express.js, AWS, Docker, PostgreSQL, Redis, pgvector**

- Architected a full-stack PaaS CI/CD platform with a **Next.js** dashboard, **Express REST API**, **Redis-backed async build workers**, **Amazon RDS PostgreSQL**, and **CloudFormation** IaC.
- Engineered isolated **Docker build sandboxes** for concurrent application compilation, optimizing resource limits and lifecycle management to eliminate **out-of-memory (OOM)** failures.
- Built a zero-DB live log pipeline using **Redis Pub/Sub** and **WebSockets**, archived logs to **Amazon S3**, and integrated embeddings with **pgvector** for semantic build-failure diagnosis.

**Deviators Dashboard** | **Next.js 16, React 19, TypeScript, Supabase, PostgreSQL, RLS**

- Architected and shipped a full-stack community and hackathon dashboard for 300+ developers using **Next.js** and **Supabase** with secure **SSR authentication** and multi-tenant profiles.
- Designed normalized **PostgreSQL** schemas with constraints, composite keys, and functional B-Tree indexes, achieving sub-20ms teammate lookup while enforcing team and seat limits.
- Implemented granular **Row Level Security (RLS)** policies governing team invites, RSVP states, memberships, and profile access to prevent unauthorized cross-user data access.

**SnipWise** | **JavaScript, Chrome Extension APIs, IndexedDB**

- Engineered and shipped a privacy-first **Chrome extension** for fast snippet capture, tagging, search, and browser retrieval with no external server dependency.
- Built an offline-first **IndexedDB** storage and search layer for structured snippet metadata, tags, and low-latency local retrieval.

## Technical Skills

**Languages & Frameworks**: TypeScript, JavaScript, React.js, Next.js, Node.js, Express.js, SQL, Python, C++
**Databases & Backend**: PostgreSQL, Supabase, Redis, REST APIs, pgvector, WebSockets, Row Level Security (RLS)
**Cloud & DevOps**: AWS, Docker, Kubernetes, Linux, Git, CI/CD, Microservices, Load Balancing, Event-Driven Architecture

## Achievements

**President** | **Deviators Club:** Leading tech community; hosted hackathons, DSA bootcamps, and tech meetups.

**Finalist** | **Innovate4FinLit National Challenge:** Recognized for building a gamified financial literacy platform.
